In simpler terms increase in level

Rules

The screenshot shows a web application titled "Keyboard Game Training". At the top, there are four buttons: "EASY LEVEL", "INTERMEDIATE LEVEL", "DIFFICULTY LEVEL", and "HOME". Below these is a section titled "Rules And Regulation Of The Game". On the left side of this section, there is a vertical menu with two buttons: "RULES" (selected) and "TIPS". The main content area displays the following text:

Left Hand

Fifth (pinkie) finger: a, z, q, and 1, along with the left shift key and the tab/caps lock key.

Fourth (ring) finger: s, x, w, and 2.

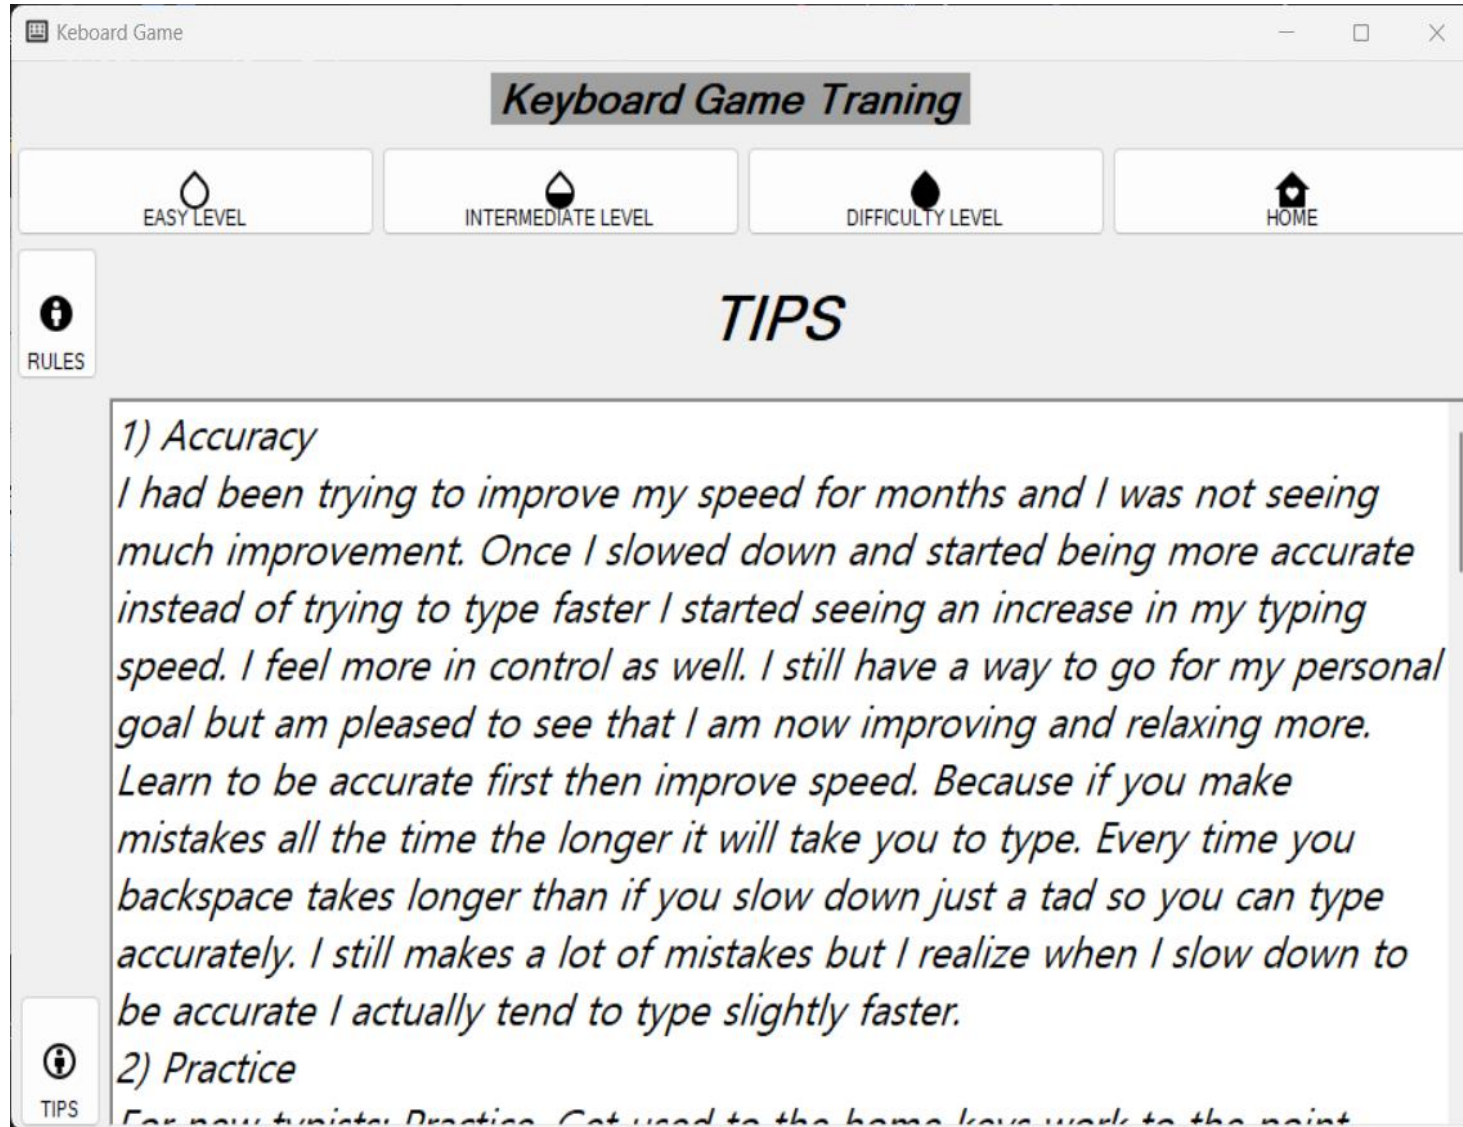

Third (middle) finger: d, c, e, and 3.

Second (index) finger: f, v, b, r, t, 4, 5, and 6.

Thumb: space bar

You can read the rules by press the rules button.

Tips

The screenshot shows a web application titled "Keyboard Game Training". At the top, there are four buttons: "EASY LEVEL", "INTERMEDIATE LEVEL", "DIFFICULTY LEVEL", and "HOME". Below these buttons is a section titled "TIPS" with a sub-header "1) Accuracy". The text in this section reads: "I had been trying to improve my speed for months and I was not seeing much improvement. Once I slowed down and started being more accurate instead of trying to type faster I started seeing an increase in my typing speed. I feel more in control as well. I still have a way to go for my personal goal but am pleased to see that I am now improving and relaxing more. Learn to be accurate first then improve speed. Because if you make mistakes all the time the longer it will take you to type. Every time you backspace takes longer than if you slow down just a tad so you can type accurately. I still makes a lot of mistakes but I realize when I slow down to be accurate I actually tend to type slightly faster." Below this text is a sub-header "2) Practice" and the beginning of another paragraph: "For new typists: Practice. Get used to the home keys work to the point".

TIPS

1) Accuracy

I had been trying to improve my speed for months and I was not seeing much improvement. Once I slowed down and started being more accurate instead of trying to type faster I started seeing an increase in my typing speed. I feel more in control as well. I still have a way to go for my personal goal but am pleased to see that I am now improving and relaxing more. Learn to be accurate first then improve speed. Because if you make mistakes all the time the longer it will take you to type. Every time you backspace takes longer than if you slow down just a tad so you can type accurately. I still makes a lot of mistakes but I realize when I slow down to be accurate I actually tend to type slightly faster.

2) Practice

For new typists: Practice. Get used to the home keys work to the point

You can get some tips for improving in tips session.
